### **REASONS FOR ALLOWANCE**

Claims 1-31 are allowed. Regarding claim 1, the prior art does not suggest the system as claimed, including the combination of all the claimed elements, the combination including that the first locking portion is configured to deflect in a direction angled relative to said first and second rotational movements. Regarding claim 30, the prior art does not suggest the method as claimed, including the combination of all the claimed elements, the combination including unlocking the connector by a rotating movement of the locking arm from a locked position and a subsequent second angled movement of said locking arm relative to said rotating movement to an unlocked position. Regarding claim 31, the prior art does not suggest the system as claimed, including the combination of all the claimed elements, the combination including that the first locking portion is configured to automatically deflect in a direction angled relative to a path of said first rotating movement, wherein said system is configured to support said first locking portion after said first locking portion deflects in the direction angled relative to the path of said first rotating movement to thereby prevent said locking arm from rotating back towards said locked position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
